

Task 1: Quick Selection Tool – Select One Person from a Group Photo

Task 2: Object Selection Tool – Select a Food Item

Task 3: Select Subject + Select and Mask

Task 4: Cut Yourself Out and Add a New Background

Task 5: Compare Select Subject and Quick Selection Tool

- Select Subject:

- Quick Selection Tool:

Write These 3 Lines

Comparison:

1. Select Subject was faster because Photoshop automatically detected the main subject.
2. Quick Selection Tool provided greater manual control for correcting small areas.
3. Select Subject produced a more accurate initial selection, while Quick Selection was useful for refinement.
